DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 5/25/04 has been entered.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

The drawings were received on 5/25/04. These drawings are accepted.

Information Disclosure Statement

The IDS filed on 4/25/04 has been received and made of record. The IDS of 8/15/05 has been received. However, since the first document listed thereon is the present application, such is not understood. Obviously the application has been reviewed. With respect to the second item so listed, it is not prior art, and hence will not be considered.

Claim Objections

Claims 17, 18 and 19 are will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

In the above analysis, claim 17 is duplicative of previously allowed claim 1, as claims 18 is duplicative (substantially) of claim 2.

Claim 19 is duplicative of previously allowed claim 6.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

1. Claims 15 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to independent claim 15, lines 5-7 recite a desired result of the light beam, i.e., based on a tracking error signal, however, since no such tracking error signal has yet to be provided, this function can not occur.

The dependent claim falls accordingly.

Allowable Subject Matter

Claims 1-14 are allowed for the reasons stated in the NOA of 2/25/04.

Claims 20-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
